Instructions

The Entertainer Gold 1 expansion package is available from version V2.86.

With this package you have acquired 227 sounds and 140 total presets, which were programmed by the well-known sound programmer Kurt Ader

Note: Before you can activate the expansion package, you must first install the sounds and total presets with a separate installation program. So before you start, first download the installation files from the WERSI website.

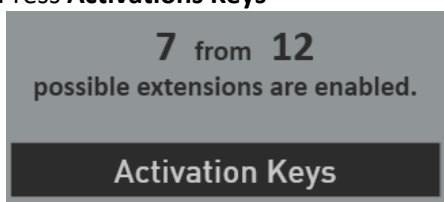

The installation consists of two files with a total size of approx. 4.3 GigaByte. You can use the following links to download the two files to your private computer, or go to the WERSI website in the Service & Downloads area.

[Entertainer1.exe](#)

[Entertainer1.7zip](#)

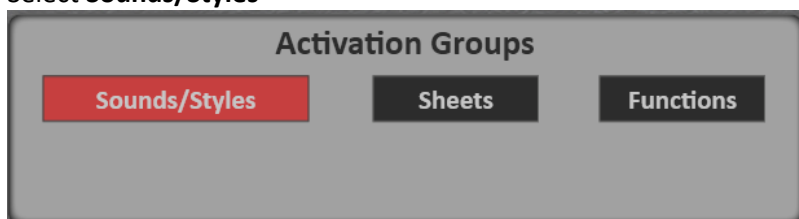

To install and activate the package, proceed as follows:

1. You have downloaded the above files onto your computer. Now copy this into the main directory (ROOT) on a USB stick or a USB hard drive.
2. Press **SETTINGS** on your OAX instrument
3. Press **Activations Keys**

The adjoining display of the maximum extensions may differ.

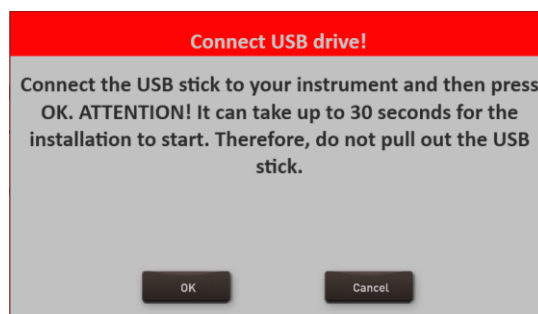

4. Select **Sounds/Styles**

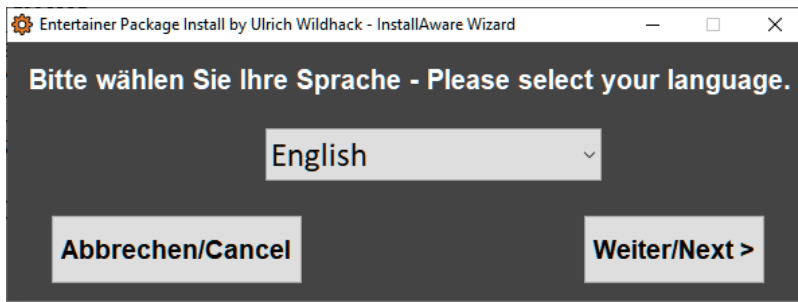

5. Now press **Install** in the Line Entertainer 1

6. A message appears stating that you have to connect the data carrier with the installation files to a USB port. Wait a few seconds until the system has recognized the USB data carrier and confirm with OK. The OAX software is closed and the installation program starts automatically.

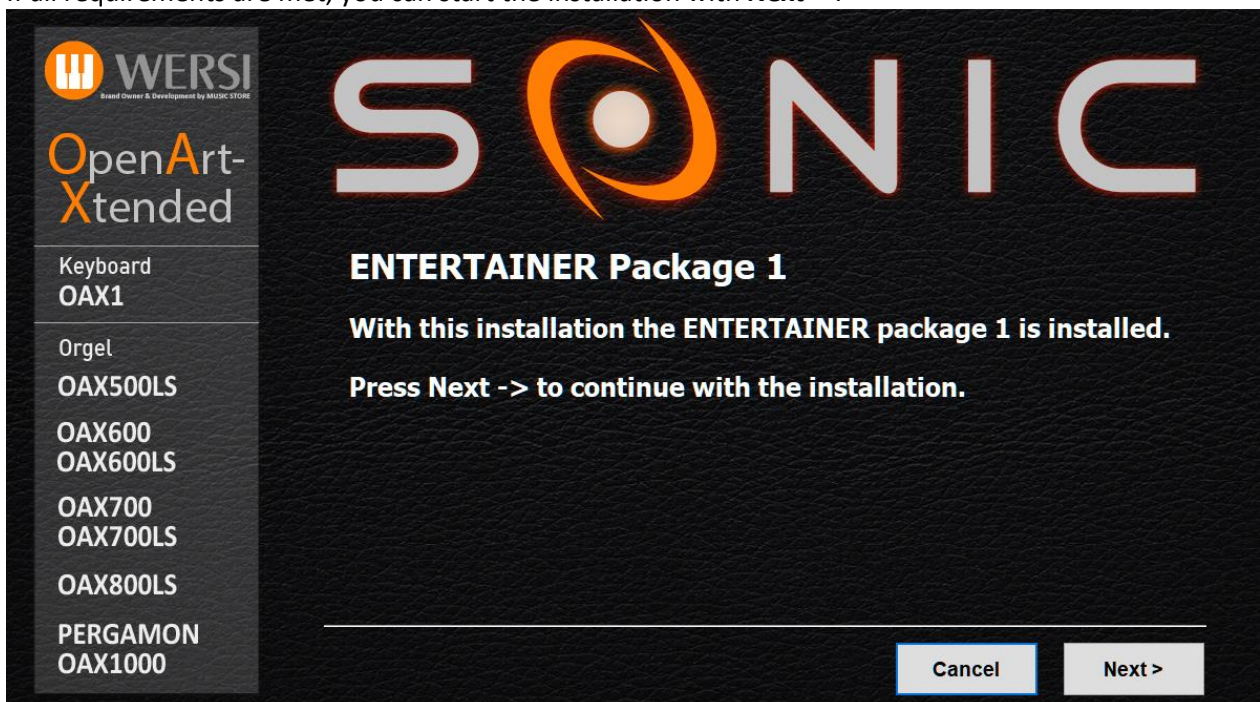

7. First you can set the installation language between German, English and French. Confirm with **WEITER/NEXT>**

Important NOTE! There are three situations in which the installation does not start.

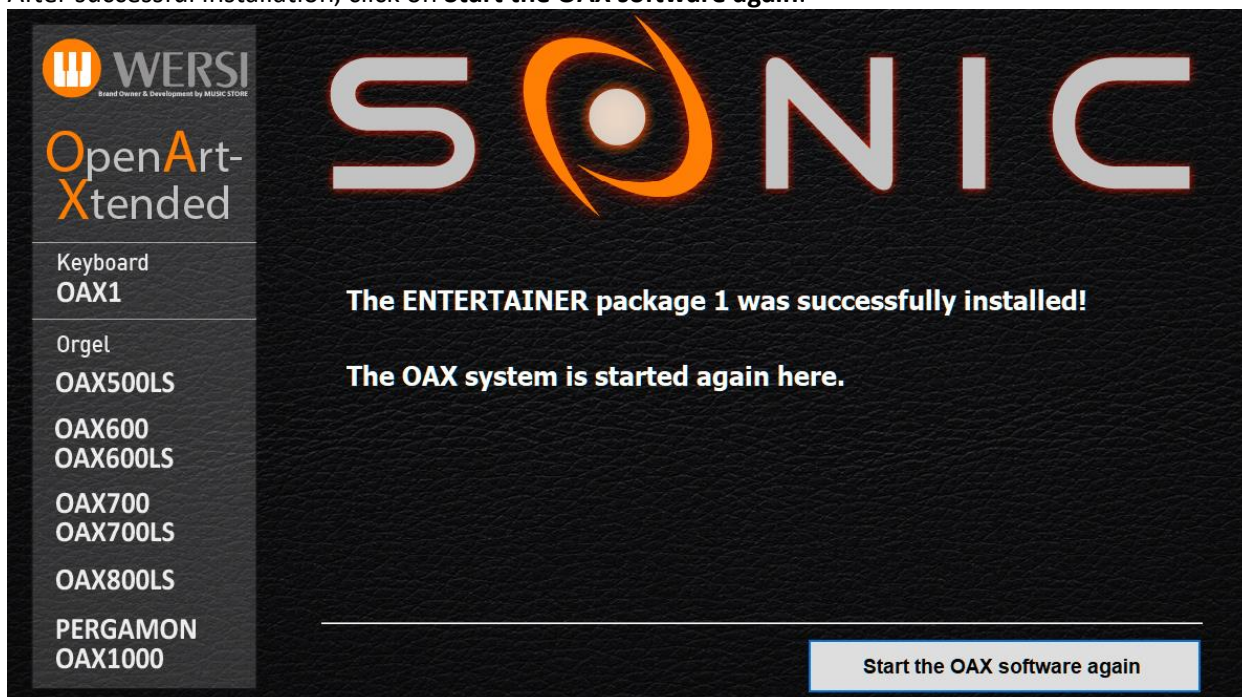

- There is no WERSI OAX software on your instrument! With **End the Process** the installation will be aborted and you will be back on the Windows desktop.
 - You are still working with an older OAX software and must first update to the current version. With **Next** the OAX software is started again.
 - The **Entertainer1.7zip** file required for installation is not on the USB medium. Please check the files on your USB stick. With **Next** the OAX software is started again.
8. If all requirements are met, you can start the installation with **Next ->**.

9. The display informs you about the progress of the installation.

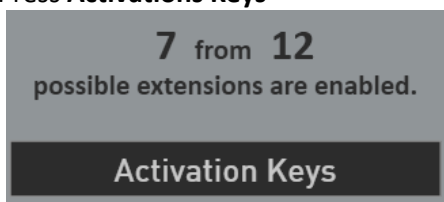

10. After successful installation, click on **Start the OAX software again**.

11. Press **SETTINGS** again

12. Press **Activations Keys**

The adjoining display of the maximum extensions may differ.

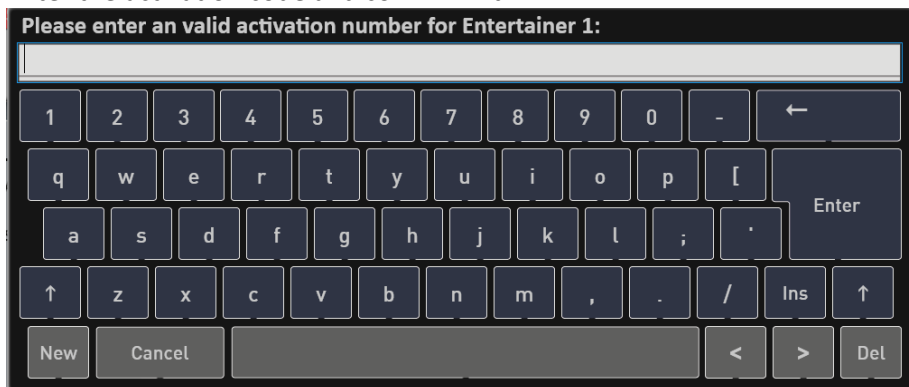

13. Select **Sounds/Styles**

14. In the line Entertainer 1, the **Install** display has disappeared and the package can now be activated. To do this, press the **Unlock** display button.

15. Enter the activation code and confirm with **ENTER**.

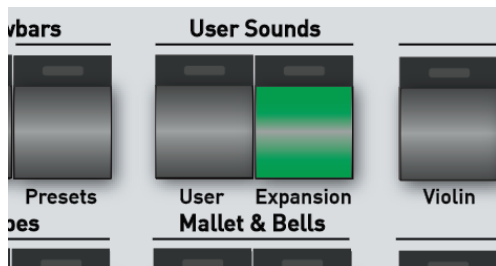

16. The expansion package is now activated.

So that all new data are loaded, switch the instrument off and on again.

Where can you find the new sounds!

There are several ways you can find the new sounds.

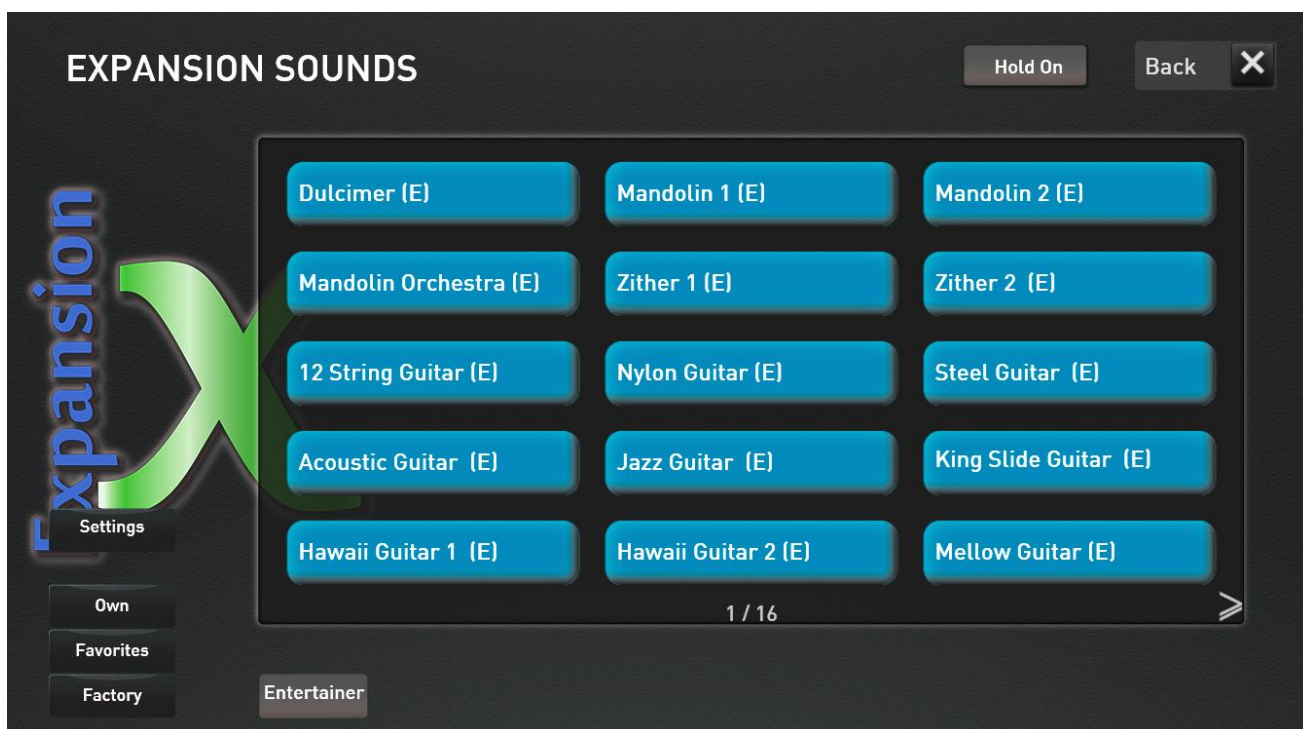

Via the sound button EXPANSION

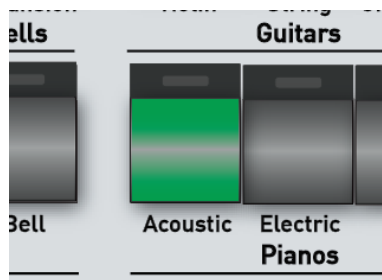

On the right control panel you can see the control panel button **Expansion** in the **User Sounds** area.

As soon as you have selected the button, all sounds are shown in the display.

The sounds are distributed over 16 levels.

Via individual sound buttons

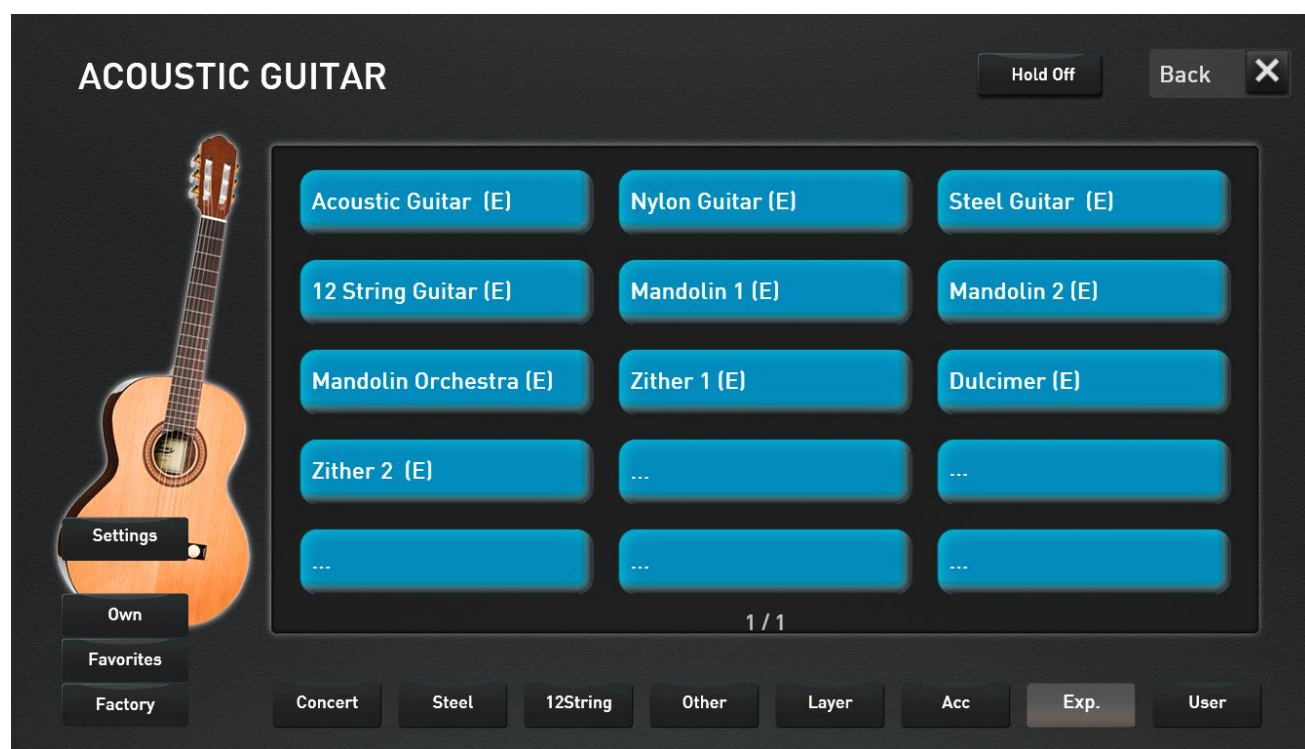

The new sounds have also been assigned to the corresponding sound buttons.

Example: All sounds that belong to the Acoustic Guitars sound group can also be found under the corresponding control panel button.

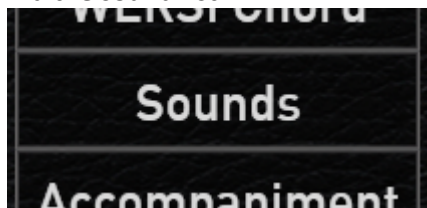

You can either switch to the respective last level by swiping. For Acoustic Guitars this would be level 6 of 6 (6/6).

Or use the subgroup Exp. (Expansion).

Note: Not every sound button is assigned with new soundss with this expansion package. The Exp. Subgroup remains empty for some buttons.

Via the sound list

Of course, you can also call up the new sounds via the sound list.

Exactly as with the selection via the control panel buttons, you will find the sounds under the selection **User sounds -> Expansion -> Enter 1**

Soundlist

Main Groups	Instruments	Subgroups	Sound	PRG
All	All	All	Synth Key (E)	035-000-094
Drawbars	User	Enter 1	Plucked Pad (E)	035-000-095

Where can you find the new Total Presets!

1. Press **Bank** or **Name** in the TOTAL PRESETS area.

TOTAL PRESETS

Bank	Name	Number	
Drawbars	Live Drawbars Standard	1	Save

2. Press **Factory** and select a bank between “Entertainer Gold 1” and “Entertainer Gold 14” on the left-hand side. To do this, keep pushing the display of the banks upwards.

TOTAL PRESETS

Bank	Name	Number	Hold On	Back	X
Entertainer Gold 6	Accordeon 2	3243			

User Factory

Select the desired Bank:

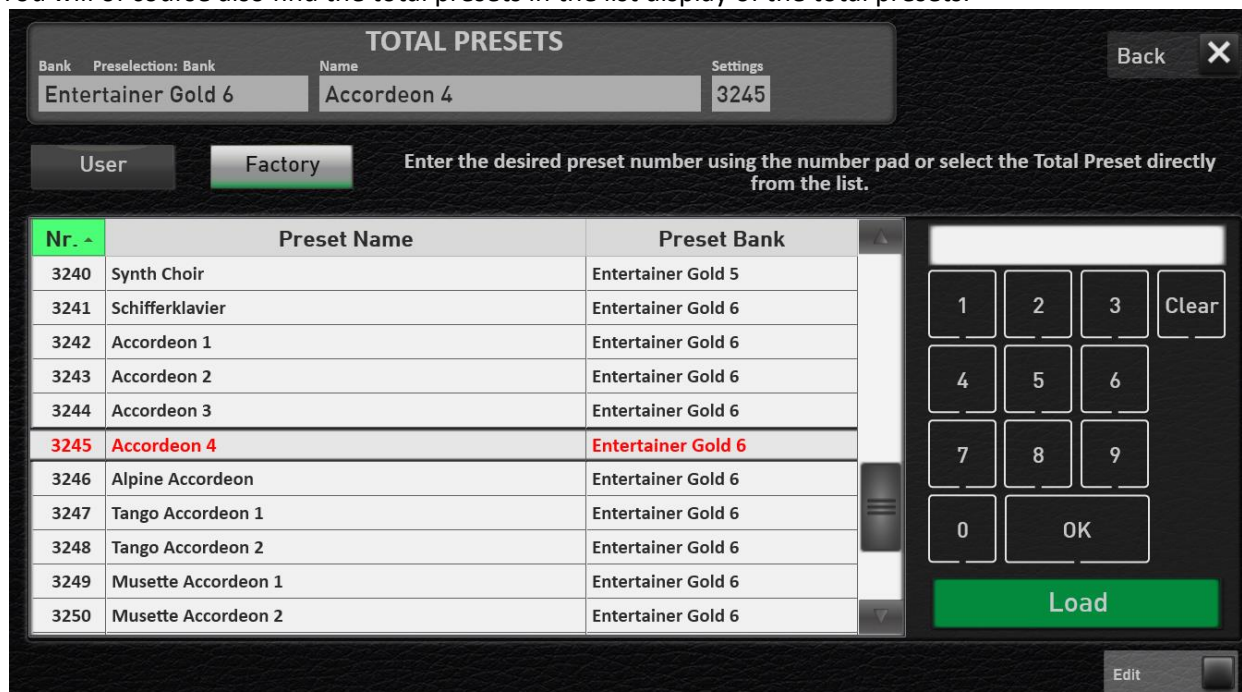

- Entertainer Gold 5
- Entertainer Gold 6**
- Entertainer Gold 7
- Entertainer Gold 8
- Entertainer Gold 9
- Entertainer Gold 10
- Entertainer Gold 11

Select the desired Total Preset:

- Schifferklavier
- Accordeon 1
- Accordeon 2**
- Accordeon 3
- Accordeon 4
- Alpine Accordeon
- Tango Accordeon 1
- Tango Accordeon 2
- Musette Accordeon 1
- Musette Accordeon 2

39 / 47

3. You will of course also find the total presets in the list display of the total presets.

TOTAL PRESETS

Bank	Preselection: Bank	Name	Settings	Back	X
Entertainer Gold 6		Accordeon 4	3245		

User Factory

Enter the desired preset number using the number pad or select the Total Preset directly from the list.

Nr.	Preset Name	Preset Bank
